

Program1 : Create a program that takes three numbers as input and finds and prints the largest number among them using if-else statements.

Input : int a = 20 , int b = 30 int c = 40

output : 40 is the largest among all numbers

Program2 : Create a program that takes three numbers as input and finds and prints the smallest number among them using if-else statements.

Input : int a = 20 , int b = 30 int c = 40

output : 20 is the smallest

program3 : Build a program that takes a single character as input and determines whether it's a vowel or a consonant using if-else conditions. (vowels : a , e , i , o , u and the rests are consonant)

Input1 : char ch = 'a';

input2 : char ch = ' b'

output1: a is vowel

output2: b is consonant

program4 : Write a Java program to print the folllowing pattern

= * = * =

= * = * =

= * = * =

program5 : Write a Java program to print the folllowing pattern

* 1 * 2

* 3 * 4

* 5 * 6
